TO WHOM IT MAY CONCERN

Jonathan McDonnell has been employed by Liberty Yachts from 1 April 1994 to 31 October 1996 as Captain on an Overmarine Mangusta 80. During this time, Jonathan's responsibilities have included:

- 1) Responsibility for the final stages of construction in the shipyard in Viareggio, Italy. This included advising on all technical aspects of the boat including electronics, navigational, hydraulics, propulsion and other systems;
- 2) Acting as Captain on the boat with a crew of two (deckhand and chef);
- 3) Maintenance and extensive development of all the boat systems during significant refits in Viareggio;
- 4) Responsibility for additional boats and tenders (Sunseeker Mustang 21 foot ski-boat, Riva Aquarama Special, four-meter Novamarine jet-drive tender).

The Mangusta is based in the port of Cap d'Ail, France and over the past few years, has undertaken predominantly day and week-end cruising on the French and Italian Rivas. The boat has also cruised Corsica, Sardinia and the Gulf of Genoa.

Jonathan was responsible for all boat administration and maintenance. He has an unparalleled technical ability with all boat systems to an extent that it is remarkable. His ability to understand problems and identify and implement solutions using the latest technologies is outstanding. We have found him to be extremely knowledgeable, practical and innovative in enhancing the boat's systems and performance.

We have found Jonathan to be reliable, honest, courteous and with an easy-going personality. We wish him well in his future endeavours.

Yours sincerely,
LIBERTY YACHTS LIMITED

Christopher L. Chandler
